

Bring Your Money Closer For More Effective Controls.

**Change to a more
proactive approach.
Move from mere
Detection to Prevention.**

- Real-time Results – Remove the gray areas from your data and process to reveal quicker savings.
- Increase collections with less vendor abrasion by addressing issues in a timelier manner.
- Increase Controls Efficiency – Gain better visibility into your controls effectiveness. Make adjustments faster to maintain control.
- Identify relevant and current control gaps faster within the Procure to Pay process which allows long term remediation.
- Increase recovery and eliminate write-offs, credits or other unknown applications initiated independently by vendors.
- Identify spend optimization opportunities through data mining and benchmarking.
- Initiate a process improvement plan that identifies trends and inconsistencies quarterly before they become overwhelming issues.
