

When Handling Our Clients Data, *Security* Is Our Number One Priority.

In order to keep our clients data secure, SpendMend maintains redundant data centers that are SSAE 16 and HIPAA certified. We also engage SOC 1 Type 2 and SOC 2 Type 2 examinations and scope controls on the data centers.

In addition to the infrastructure investment, we also:

- Developed an Information Security Policy for our employees
- Require training in HIPAA security
- Use only non-contract employees to manage your data
- Maintain strict contractual data security precautions with our partners

All of this provides maximum stability and security for your data, because keeping your data safe is our priority and promise.
